INTRODUCTION

Event：   Vietnam ICTCOMM2022

Time：   9th – 11th June 2022

Venue：   Saigon Exhibition & Convention Center (SECC),
                799 Nguyen Van Linh, District 7, Ho Chi Minh City

Show Host：   Ministry of Information & Communications
                Ministry of Industry & Trade
                Ministry of Science & Technology

Organiser: Adpex Joint Stock Company
                Vietnam Internet Association (VIA)
                Vietnam Association for Information Processing (VAIP)
                National Agency for Technology Entrepreneurship &
                Commercialization Development (NATEC)
                Vietnam Climate Innovation Center (VCIC)

VIETNAM ICTCOMM is a great platform through which businesses in the telecommunication industry are connected, and their corporate brands and products / services are effectively promoted. In addition, the Exhibition is expected to contribute to the expanding international field of artificial intelligence solutions. Below are the three co-located events:

The Vietnam BROADCAST 2022 is Vietnam's leading international event in broadcasting. Vietnam Broadcast 2022 will focus specifically on the trends of innovative technologies that are disrupting the digital multimedia and broadcasting industries, showcasing the latest in IoT, Blockchain, Big Data, AI, AR, VR, OTT, Pro-Audio, Live production, Immersive Platforms etc.

The Vietnam ELECTRONICS 2022 event that showcases emerging technologies, and enterprise solutions. Discovering the hottest electronics products, new ideas, new technology – including the latest from production to processing and other industry leaders.
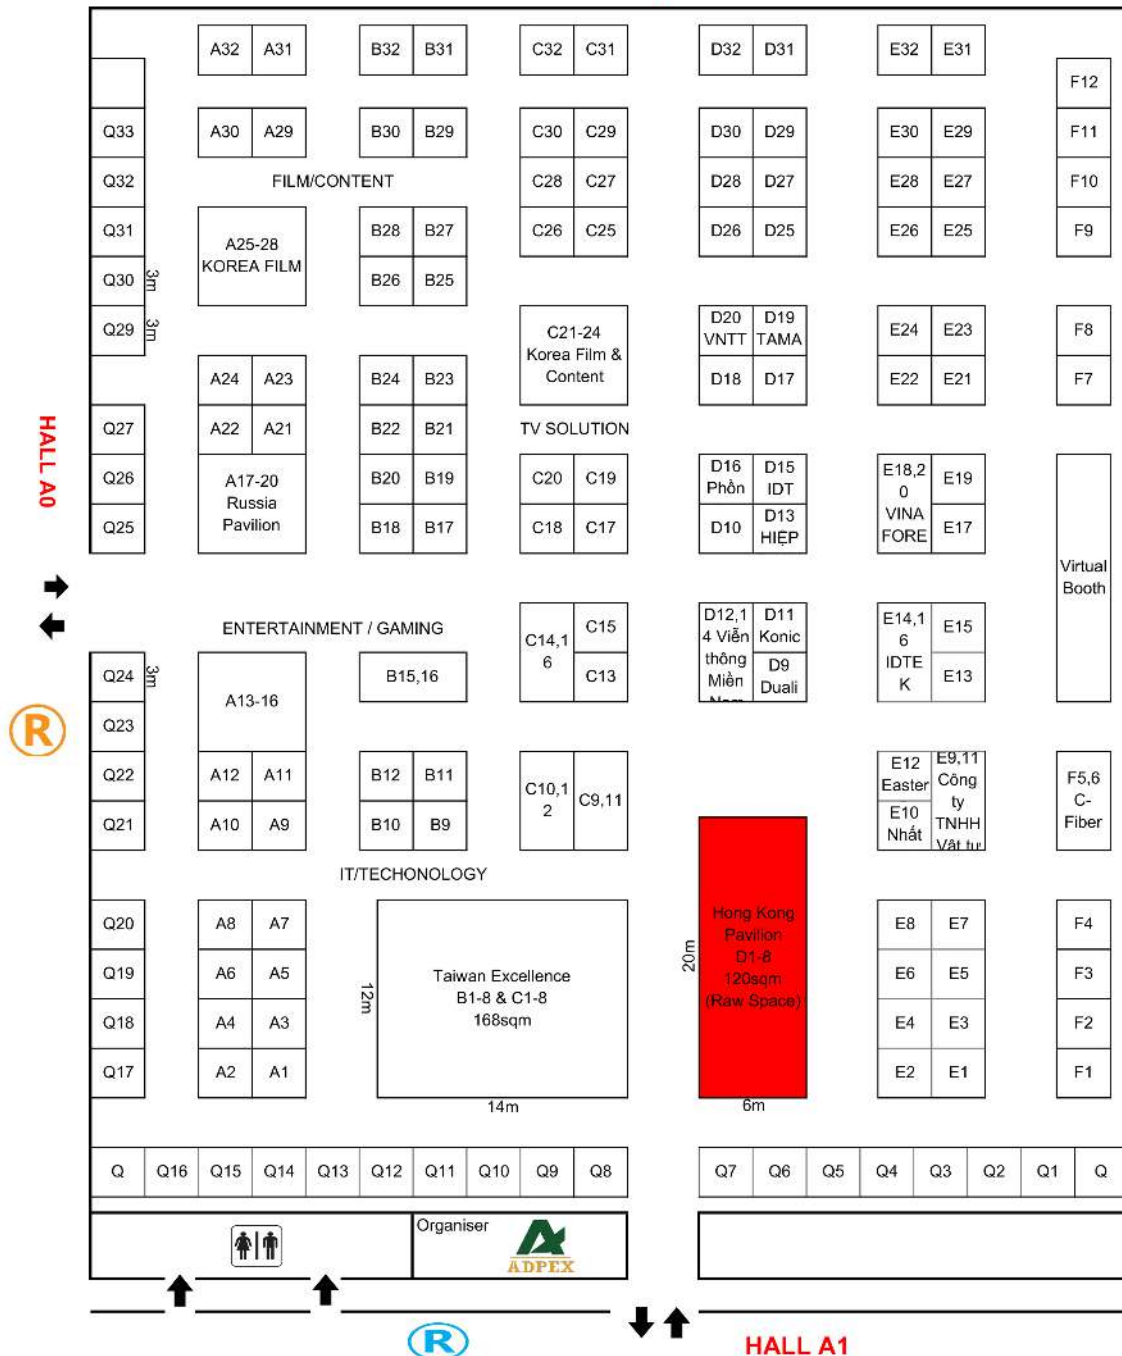

The TELEFILM Vietnam 2022 will be attended by market leading local, regional and international suppliers who will present the very latest content & programmes (creation, production, distribution), services (licensing, formatting, editing, dubbing, recording, subtitling), equipment & technology for production, pre-production and post-production.

BOOTH DESIGN

HONG KONG PAVILION, D01 - D08

"The promotion of Hong Kong's outstanding software, information and communication technology (ICT) industries in 'One Belt One Road'"(referred herein as the Project) is organised by Hong Kong Software Industry Association (HKSiA) and funded by the Trade and Industrial Organisation Support Fund of the Trade and Industry Department of the Government of the Hong Kong Special Administrative Region.

The Project, running from 2019 to 2022, sets up 4 Hong Kong Pavilions in different OBOR countries, namely Thailand, Singapore, China and Vietnam and organizes 4 workshops to promote the latest technologies and practical tools available to the industry in Hong Kong. It provides a valuable opportunity for Hong Kong companies to upgrade and showcase their excellent products and services.

HKSiA sports a pavilion of 120sqm in Vietnam ICTCOMM2022 for 22 Hong Kong companies to co-exhibit and promote their businesses in Vietnam. The exhibitors are focusing on four key areas: Big data, Fintech, Cloud computing, and Business solution.

EXHIBITOR INFORMATION

ACE VR Limited

TEL: (852) 6899 2869
Email: elaineto88@gmail.com
Website: https://acevirtualreality.com
Address: Room 59, Entrepreneurship Centre, Level 5, Core F, Cyberport 3,
                            100 Cyberport Road, Hong Kong

Clinical assessment of vision-related disability experienced by visually-impaired patients is obfuscated by the lack of instruments that can inform real-world visual performance. We have constructed virtual reality (VR) environments in a VR headset simulating day-to-day activities to visualize and quantify visual disability. These include supermarket shopping, stair navigation (daytime and nighttime) and city navigation (daytime and nighttime). Our data support that VR simulations can empower clinicians to better understand a patients perspective of how daily activities impart disability and connect clinical test results of vision to relevant performance measures.

Product/Service:

Evaluation of Visual Disability

Five interactive VR environments have been designed for display in a commercially available VR headset, simulating common activities including (1) supermarket shopping, (2) stair navigation in daytime, (3) stair navigation in nighttime, (4) city navigation in daytime, and (5) city navigation in nighttime to evaluate visual disability. By integrating various VR performance parameters to calculate the VR disability scores, it is feasible to identify patients with vision disability. A key advantage of the VR simulations is the ability to recapitulate the complexities and varieties of daily tasks in a standardized environment for review and analysis by patients and clinicians. For example, self-reported poor night vision is a common complaint in glaucoma patients with visual field loss, but clinicians may underestimate the degree of disability because many glaucoma patients have normal visual acuity even at the late stages.

Cherrypicks Limited

TEL: (852)2127 7788
Email: info@cherrypicks.com
Website: https://www.cherrypicks.com/
Address: 18/F, 10 Knutsford Terrace, Tsimshatsui, Hong Kong

Established in 2000, Cherrypicks is a home-grown technology startup headquartered in Hong Kong and now a subsidiary of NetDragon Websoft Holdings Limited (HKSE: 777). The company is a regional Mobile Technology and Mobile eCommerce leader specializing in smart city, augmented reality, artificial intelligence, eWallet and location intelligence. With disruptive O2O solutions as well as patent-pending products and technology inventions, Cherrypicks has won over 100 international and local awards in technology and digital marketing. They include winning the 'Oscars' of the IT field, being crowned the World Summit Award Mobile Global Champion and APICTA Winner Awards.

Product/Service:

Location Intelligence Solutions (Indoor) - Starbeacon x IndoorAtlas, Xandar Kardian

Cherrypicks is a leader in indoor positioning, people counting and presence detection location intelligence solutions. For indoor positioning, Starbeacon x IndoorAtlas is your one-stop solution from frontend app development in designing apps with expert understanding of UI/UX design and technical limitations on hardware and mobile operating systems, to backend infrastructure setup and project deployment by synergizing hardware and software to ensure the optimization of performance, operation and maintenance. For people counting and presence detection, our official partner Xandar Kardian offers a radar-signal processing deep tech solution based on micro-vibration pattern recognitions gathered from radars. No wearables needed. The patented technology maps and processes data from micro-vibrations human bodies generate naturally and constantly. The solution analyzes vital signs such as the chest movement as humans breathe as well as their heartbeat as the heart pumps blood, all with an accuracy detection rate of 99%.

GeoAR

GeoAR is a personal guide to both indoor and outdoor environments with seamless transition supporting Augmented Reality as well as 2D map view. Along with traditional functions such as turn-by-turn navigation with auto re-routing, GeoAR enriches the smart journey experience with virtual signages and AR signage translations. Provide familiarity to the audience by using your own mascot or create a custom-made mascot as the avatar to guide the way.

EXHIBITOR INFORMATION

Ensemble Technologies Limited

TEL: (852) 9656 4205
Email: kim@ensembletechs.com
Website: https://www.ensembletechs.com
Address: Unit 2302, 23/F New World Tower 1, 18 Queen's Road Central, Hong Kong

Ensemble Technologies Limited was founded by a team of forward thinking technology specialists in quantitative analysis and artificial intelligence. By leveraging digital and analytics our mission is to drive health industry into a new era of digital health ecosystem.

Product/Service:

Smart Health Platform with IoT

Ensemble Technologies Limited is a technology company specializes in data analytics. Our new digital health platform provides a suite of advanced solutions for the industry, including digital health AI models, health IoTs implementation for health management, medical practice management solutions for medical and alternative health professionals. The platform aims to facilitate medical and health professionals for more interactive healthcare services to their customers on a continual basis.

Eureka Holding Limited

TEL: (852) 3590 8508
Email: enquiry@finmonster.com
Website: https://www.finmonster.com
Address: Rm 4, Cyberport Entrepreneurship Centre, Level 5, Core F, Cyberport 3, Hong Kong

Created by a pool of innovators, Finmonster is designed to make business banking simpler than ever before. From opening a cash account to securing financing, banking services is essential to every business. Until now, however, business banking has been needlessly complex. Even successful businesses have struggled to get the right support and proper funding.

Product/Service:

Intelligence Invoicing and Receivable Management

Cloud-based invoicing and account receivable management. Our platform target to improve the operating efficiency of the Corporate Banking. The existing practice of Corporate Banking frequently incur various mismatching between Corporate and Market supplier such as banks. A platform that clearly solves the mismatching would facilitate the communication between clients and supplier and allow clients to obtain a lower cost in a short time. Meanwhile, market supplier is able to locate their target customer with accurate and efficient channel.

Firedog Creative Company Limited

TEL: (852) 2578 8978

We aim to create dreams and bring fulfilling lives to people worldwide with hopes on the future embedded in a brand-new multimedia digital entertainment.

Product/Service:

Our Services

Planning, production and manufacturing of game software, comics, animation and IP related products.

HK DECOMAN Technology Limited

TEL: (852) 6702 0541
Email: viann_tang@hkdecoman.com
Website: https://hkdecoman.com/
Address: Unit 303, Global Gateway Tower, No. 63 Wing Hong Street, Cheung Sha Wan, Kln , Hong Kong

HKDECOMAN is a one-stop O2O renovation platform, aiming to disrupt the traditional renovation industry by bringing standardization, transparency, convenience and automation to the industry, provides an integrated solution to home owners with different renovation needs.

Project Department provides hassle-free A.I. smart-matching and consultancy service to help users find the most suitable contractors and monitor the renovation process; Mall delivers an O2O materials purchase experience; Academy departs renovation knowledge to increase the industrys transparency.

Through these business solutions, HKDECOMAN creates an ecosystem in turn bringing huge traction, traffic, and multiple revenue streams that sustain our advantage and solidify our business model.

Product/Service:

HKdecoman Smart matching system

With smart-matching technology, we not only address the problem of mismatch but also create competitive advantage and scalability.

Smart Matching system refer the customer demands to suitable renovation companies after an algorithm-based selection from our database of 1000 suppliers registered.

To illustrate, the matching system translate complicated and abstract needs from houseowners into a set of parameters which is used for matching with the company tags set according to interviews and track records via our in built algorithm.

Comparing with most online platforms in SE Asia who does matching either manually through sales expertise, or by using v ery simple tag-to-tag mechanism, our sophisticated method takes care of hundreds of parameters and tags, it elicits implicit needs, and can enhance with time through project evaluation.

EXHIBITOR INFORMATION

Hong Kong Intellectual Property Exchange, Limited

TEL: (852) 9789 4382
Email: kt.ng@hkipx.com
Website: http://www.hkipx.com/

survey.la Online Survey & Research Solutions

How often do you come across a piece of information that makes you go Wow! Thats something new. Not much these days, Id imagine. With so much indiscriminate data and information coming at us from all directions at increasing speed, encountering something that wows you has sadly become quite rare. At the same time, the pressure to build and maintain a successful business based on timely and relevant intelligence and insights has never been greater. Indeed, the ability to separate the noise from the music is an inescapable challenge we confront every day. We delivers your Wow! moments At Survey.la, our goal is very simple. We help you discover the Wow! moments that matter to your business. Combining the best practices in marketing research with the power of the Internet, we design, conduct and deliver quality consumer insights through the use of targeted, on-line surveys. Time and cost efficiently.

Maestro IPS - Interactive Publishing Platform

MAESTRO IS THE MOST ADVANCED DIGITAL PUBLISHING TECHNOLOGY IN THE WORLD Maestro Interactive Publishing Suite is a powerful digital publishing system for interactive publications. Developed by PMT at 2009, the program is used to publish and distribute digital publications. The publications support multiple platforms such as iOS, Android and Windows, granting unrestricted use to any machine. Combined with a Cloud enabled user-friendly interface, it is easy to learn and is optimal for individual designers and ad agencies, major media and brand organizations to create, distribute, monetize, and optimize robust interactive publications. Maestro IPS received a number of awards for its superior performances, including HKICTA Grand & Gold Awards, APICTA Winner Award and UN WSA Mobile Award-winning software. Available editions: Maestro IPS, Maestro Comic Builder, Maestro ePub, and Maestro SCORM.

WANTECH Innovation Technology Co., Ltd. was established in 2014, we are committed to providing a wide range of quality, economical and advanced IT products and services to SMEs, from communication systems, website and mobile application development, to resource management system (ERP) which assists in the integrated management of enterprises. Our corporate culture is Simple SMART, as we are committed to creating an efficient and smart business environment our company, as well as all corporations that use our products. From operation to management of any corporation, we believe that companies can effectively use smart systems to make their business more successful.

Product/Service:

W ERP

W ERP is a technologically innovative enterprise management system that breaks the traditional enterprise management system framework developed with cloud technology, so it can be run on any device anytime, anywhere without installation. WERP provides more than 100 functional modules, which can be chosen at each users preference and requirement, providing full front-end to back-end integration, suitable for different companies in different industries to access a fully integrated and smart company management system. WERP is also highly flexible and capable to integrate with most 3rd party applications, which allows customers to sync their operations while keep everything centralized in one system. Understanding that SMEs concern on costs, we have a very flexible costing structure to enable even single person company can afford to utilize an ERP system to build a strong integrated foundation for their business.

Wildfaces Technology Limited

TEL: (852)8216 2219
Email: adm@wildfaces.ai
Website: https://wildfaces.ai
Address: Unit 12, Level 9, Core F, Cyberport 3, 100 Cyberport Road, Hong Kong

Wildfaces owns On-the-Move visual AI software utilizing moving IoT devices such as smart wearables, flying drones & walking robots to assist customers in solving their pain-points without the needs of installing massive IoTs or fixed infrastructure. Wildfaces has topped Gartners worldwide list as the most comprehensive vision-based artificial intelligence company surpassing 97 other major suppliers. Companys core technology, WildAI, was conceived and developed by the founder. Its uniqueness has been widely recognized and a patent on it has been granted (HK1261909, approved on January 2020). WildAI goes beyond Deep Learning to better mimic complex intelligence to cope with real-life complexity.

Product/Service:

AUTOMATED FACILITY MANAGEMENT

Visual AI solutions provided by Wildfaces - its on-the-move WildAI can bring to you remarkable benefits of digital transformation for the facility management industry and transform it into an automated process. it has comprehensive use cases that include:
- providing accurate, Automated Fever Detection performing multiple temperature checks from a distance even in extreme crowds without any human intervention. Its award-winning fever tracking and social distancing capability ensures potential virus carriers will be contained immediately - controlling staff contactless access, automate inspection/work flow and ensuring safety in workplaces and ever changing construction sites

SMART MAINTENANCE

Smart maintenance from WildAI can provide automatic checks on equipment to ensure it is running healthily eliminating time-consuming and tedious manual processes that are highly error-prone. WildAi is a vision-based Artificial Intelligence that can emulate the human brain for carrying out complex preventive maintenance work automatically. These include identifying overheating of pump, corroded pipe that leaks and automatically stop escalator if a small object (i.e. a screw or coin) is about to fall into its mechanism. WildFaces' Smart Maintenance provides early warning of potential failures. It can predict & prevent failure & Save you Money.

BACKGROUND OF
HONG KONG'S ICT INDUSTRY

Hong Kong is a leading business centre in the Asia-Pacific region mainly due to her advanced telecommunications infrastructure. In 2020, the industry of information and communications generated HK$95.6 billion in revenue, contributing to 3.5% of GDP. In the World Competitiveness Yearbook 2020 by the International Institute for Management Development (IMD), the overall competitiveness of Hong Kong rank fifth among 63 countries, and also for the part of digital ranking. Hong Kong has a large pool of skilled ICT professionals, providing services for clients spanning a wide range of businesses. According to the Census and Statistics Department of the Hong Kong Government in 2019, there were 11,095 enterprises in ICT industry, with 108,982 persons engaged in the ICT sector, including professional and technical workers (e.g. network engineers, technicians, programmers, web portal designers, information technology professionals, etc.) and workers in non technical fields (e.g. clerical and accounting staff).

To foster the ICT development, Hong Kong Government has put in place various initiatives, such as funding support, provision of infrastructure, international cooperation and manpower development. Also, with rising corporate engagements in incubation and accelerators programmes, new initiatives to help start-ups hatching from universities, particularly the emergence of start-ups with a "unicorn" status, it is anticipated that Hong Kong's technology sector may soon reach a tipping point and will be propelled into much faster growth.

Currently Hong Kong Government has a Talent List which comprises 11 professions. Talents in the List are those Hong Kong needs most in the immediate to medium term for the development of economy. Big data software engineer and cyber security specialist are specifically needed for Hong Kong's ICT industry. We believe the unlimited opportunities in Hong Kong definitely attract targeted ingenious talents from around the world to create cluster effects, stimulate the development of local talents and propel Hong Kong forward.

We also believe with new opportunities from the Guangdong-Hong Kong-Macao Bay Area development, Hong Kong will further capitalize on its advantages in R&D capabilities, technological infrastructure, legal system and intellectual property protection to spearhead the ICT development, and act as a solid business platform for innovative companies to access the Asian market, or mainland China's innovative companies to go international.

ORGANISATION OF
HONG KONG PAVILION

INTRODUCTION OF HKSIA

The Hong Kong Software Industry Association Limited (HKSIA) is the organiser of Hong Kong Pavilion. It is a Hong Kong registered non-profit making organisation founded by a group of IT professionals and IT corporations in Hong Kong dedicated to the China market. Its main purpose is to identify and develop business opportunities for Hong Kong software companies through cooperation with the mainland or overseas counterparts. The consensus driving the collaboration of all in forming the association is the conviction that the Hong Kong software industry can better manifest itself and benefit by integrating with the vast market and resources of the mainland.

Henceforth, HKSIA has set its

Objectives on
1. Promoting software industry development and exploring business opportunities in the mainland and overseas.
2. Coordinating with foreign software industry for better resources allocation, benefits sharing and mutual added value.
3. Strengthening co-operation and enhancing communications between Hong Kong and mainland software industries.
4. Achieving mutual benefits of business growth for Hong Kong and mainland software companies through international exposures, exchange of project management skills and technical talents.
