EXHIBITON

Introduction

Event:	Asia Tech x Singapore
Time:	13th – 16th July 2021
Organiser:	Infocomm Media Development Authority Informa Tech
Supported by:	Singapore Tourism Board Singapore Exhibition & Convention Bureau

Asia Tech x Singapore (Former name: ConneCTechAsia) is an Asia's flagship tech event where technology intersects with society and the digital economy. Singapore is the gateway and a Global-Asia node to the world fastest growing digital economies. ATxSG promotes conversations only possible in Singapore across business, tech and government leaders that will form our shared digital future. ATxSG enables participants to network and keep their finger on the pulse of the latest tech trends, challenges and opportunities.

This inaugural event builds on the foundations of Singapore's Smart Nation Innovation Week and Informa Tech's ConneCTechAsia into a single flagship tech platform. Spanning over several days, ATxSG will host conferences as well as exhibition markets places, providing deeper insight into modern hottest topics in business, technology and social impact including the invitation-only ATxSummit gathering governments, global enterprises and communities for in-depth discussion on the role of technology in our shared digital future.

ConneCTechAsia is an umbrella event encompassing CommunicAsia, Broadcast Asia, SatelliteAsia and TechXLR8 Asia that will be held from 14th -16th July 2021. Meanwhile, the Hong Kong Pavilion is located in CommunicAsia, which is creating a networking and insights power-event catering for the region's telecoms ecosystem.

EXHIBITON

Hong Kong Pavilion

“The promotion of Hong Kong’s outstanding software, information and communication technology (ICT) industries in “One Belt One Road”(referred herein as the Project) is organised by Hong Kong Software Industry Association (HKSIA) and funded by the Trade and Industrial Organisation Support Fund of the Trade and Industry Department of the Government of the Hong Kong Special Administrative Region.

Running from 2019 to 2021, the Project sets up 4 Hong Kong Pavilions in different OBOR countries, namely Thailand, Singapore, China and Vietnam and organises 4 workshops to promote the latest technologies and practical tools available to the industry in Hong Kong. It provides a valuable opportunity for Hong Kong companies to upgrade and showcase their excellent products and services.

HKSIA spots a virtual pavilion in ConnecTech Asia 2021 for 22 Hong Kong companies to co-exhibit and promote their businesses in Singapore. The exhibitors are focusing on four key areas: Big data, Fintech, Cloud computing, and Business solution.

EXHIBITOR INFORMATION

Actywell Digital Limited

TEL: (852) 3571 9877
Email: sales@heraleto.com
Website: <https://www.heraleto.com/>
Address: Flat F, 14/F World Tech Centre, 95 How Ming Street, Kwun Tong KL, Hong Kong

We at Actywell realised that whilst many people care about their fitness, mental and physical health, they are often too busy with work demands and other commitments to keep on top of their health. Thus, Hera Leto by Actywell provides AI-incorporated hearables with sensing technology solution accessible globally for all ages, skin colours and uses. The technology very accurately obtains and computes many vital bio-signals including Heart Rate, RR Interval and Respiratory Rate of the wearer under motion, continuously in real-time. The hearables fit comfortably and are optimum for Medtech applications, especially remotely (tele-medicine) for smarter, more accessible health care.

Product/Service:

HERA LETO TEMPERATURE

Hera Leto Temperature (HLT) is a sensor-rich earbud which allows wearers to make calls privately while using patented and award-winning technology to accurately and continuously detect the wearers physiological information in real time. This includes Heart Rate, Body Temperature and especially early COVID-19 symptoms (Fever, Fatigue, Shortness of Breath). HLT is a COVID-19 Risk Management solution for productivity lost prevention. If HLT detects Covid-19 symptoms in an employee, the company centralised system will be alerted allowing for segmentation to avoid full business shutdown. HLT also aids to boost customer confidence. Customers know that their servicemen, shared ride drivers, food deliverers etc. have been Covid-19 Symptoms Free. Additionally, HLT offers individuals mental health management to detox Covid-19 stress syndrome and efficient physical health management with Power-Walk function. As an earpiece, it offers crystal clear communication via Bluetooth pairing to a personal digital device to make calls/ attend online seminars etc.

Altai Technologies Limited

TEL: (852) 3758 6036
Email: winniesham@altaitechnologies.com
Website: <https://www.altaittechnologies.com/>
Address: Unit 209, 2/F, Lakeside 2, 10 Science Park West Avenue, HK Science Park, Hong Kong

Since inception in 2006, Altai Technologies is a leading provider of industrial-grade WiFi products and technologies with deployments in over 100 countries with facilities including container ports, factories, warehouses and power plants. Altai Super WiFi Solution includes a complete portfolio of indoor and outdoor products for various industries and enterprises to support a wide range of automation and smart manufacturing applications, such as AGVs, IoT sensors, remote management, surveillance cameras and environmental monitoring etc.

Product/Service:

ALTAI SUPER WIFI TECHNOLOGIES FOR INDUSTRIAL DIGITIZATION AND AUTOMATION

SuperWiFi Access Point with Proprietary Smart Antenna Technology and Signal Processing Algorithm on WiFi, achieving up to 1.7km LOS and 500m NLOS to any standard WiFi devices. In addition to our last mile access technologies, Altai's point to point technologies can immediately enable remote area up to 10km with connectivity. All selected products are also compliant with IP67 which is able to endure in harsh environment such as powerplants. AltaiCare supports an innovative, controller-less, cloud-based architecture for the access management of APs, providing secure admission and service control across a WiFi network.

EXHIBITOR INFORMATION

Applied Technology Group Limited

TEL: (852) 2122 9556
Email: cm.lam@ATG.ai
Website: <http://www.ATG.ai>

Hong Kong Logistics Technology & Systems Limited

TEL: (852) 2763 6874
Email: marketing@bps-group.net
Website: <http://www.bps-lts.com>
Address: 7 Floor, SML Tower, 165 Hoi Bun Road, Kwun Tong, Hong Kong

Hong Kong Logistics Technology & Systems Limited is a member of BPS Global Group with over two decades in logistics technology industry offering solution design and consultancy, logistics automation, operations improvement services. Logistics Technology is at the heart of today's extended global supply chain, we help our clients' businesses embracing industry 4.0 with automated warehouse and logistics system to attain increased efficiency, reliability, and responsiveness. We offer tailor-made solutions for clients with staged investment, flexibility, and scalability for future expansion. Our solution starts from professional solution design and consultancy service, logistics automation consulting to first-class project execution and maintenance services.

Product/Service:

SMART SELF-STORAGE SERVICE

BPS generated a new concept of total solution with mobile applications to create an IoT system, which combined the elements of robots, big data, AI, and other cutting-edge technologies. It is also the world's first IoT robotic application in B2C self-storage business. Customers can interface with our AGV robot system by mobile applications. This is a breakthrough to employ robotic solutions from B2B to B2C market. The Cabinet to Person (CTP) concept reduces the travelling and waiting time of customers. On the other hand, the security, privacy, and enjoyment are much improved. The application of big data and AI can enhance the cabinet retrieval efficiency while the storage density can also be optimized. By the robotic solution, the storage area can be defined as a no-man zone. Honoured the Smart Mobility (Smart Logistics) Gold Award at HKICT Awards 2019 by GS1 Hong Kong.

SMART AUTOMATED WAREHOUSE SOLUTION

BPS Global has developed the smart automated warehouse solution for a leading pharmaceutical outsourcing service company which is also one of the largest Integrated Health Care Automated Warehouse in Hong Kong, compliant with GMP regulations. BPS Global helped the client on process improvement, operational performance boost, operational cost optimization, space utilization, and storage capacity enhancement. Our smart automated warehouse solution features a series of advanced automation set-up, robotic technology, and warehouse storage system including the highest carousel storage system in Hong Kong (Over 5 meters), mobile robots, and conveyor systems to meet with the strict requirements and conditions of pharmaceutical storage, as well as in compliance with the GMP standard and Department of Health (DOH) guideline. Honoured the Smart Mobility Grand Award at HKICT Awards and Smart Mobility (Smart Logistics) Gold Award at HKICT Awards 2018 by GS1 Hong Kong.

Address: Unit 2601B, 26/F, Yen Sheng Centre, 64 Hoi Yuen Road, Kwun Tong, Kowloon, Hong Kong

Founded in 2005 headquartered in Hong Kong, OceanX Technology has been developing innovative products including OceanFax - the Asia's No.1 award-winning & best-selling fax server, as well as OceanX ECM - the first cloud based ECM System in Asia. OceanX ECM won the Hong Kong ICT Awards 2019: Smart Business (Solution for Business and Public Sector Enterprise) Certificate of Merit and acquires APAC CIO Outlook Top 25 DMS award, among 400 DMS candidates. As a partner of global technology giants - SAP, Cisco, Avaya, HP, Ricoh, Microsoft & Huawei, the company's mission is to develop world-class solutions for local markets.

Product/Service:

OCEANX ECM

OceanX ECM is the first cloud-based Enterprise Content Management System in Asia. It won the Hong Kong ICT Awards 2019: Smart Business (Solution for Business and Public Sector Enterprise) Certificate of Merit and acquires APAC CIO Outlook Top 25 Document Management System award, among 400 DMS candidates. OceanX ECM is a comprehensive Enterprise Content Management system which includes Document Management System, Document Capture, Document Processing Center, Share and many powerful features. It supports cloud-based and on-premise. Powerful features like E-mail Management enable users to easily file and search all incoming and outgoing e-mails with attachments; one interface for managing e-mails and ECM. Office Add-in tightly integrates with Microsoft Office, users can directly save documents into OceanX ECM. Its patented technologies like Bulidingblocks, CapturePlus and ImagePlus increase user adoption rate.

OCEANFAX FAX SERVER

The OceanFax Fax Server is Asia's NO.1 best-selling and award-winning fax server. It is the most innovative world-class fax server which delivers documents efficiently and reliably, seamlessly integrates with email, ERP and MFP, supports IP faxing, streamlining business processes, automating faxes and increasing productivity. OceanFax Fax Server is designed to support high-volume document delivery in an efficient and reliable way. Built on .NET technology, OceanFax is the first fax server brand in the field to support Unicode, Multi-language, Fax Data Mining, Super User, Black & White List, Windows on the Web, Fax Report Generator and Approval & Stamp. Besides, OceanFax achieves the highest quality of fax conversion with its original ImagePlus Patent Technology, supports Least Cost Routing, Self-defined Chinese & Image Header & Footer and Quick Search.

EXHIBITOR INFORMATION

Socif Limited

TEL: (852) 6277 3337

Email: jason.yuen@socif.co

Website: <https://socif.co/>

Address: Unit 939, Building 19W, No. 19 Science Park West Avenue, Hong Kong Science Park, Shatin, Hong Kong

Established in 2018, SOCIF is a technology start-up specialized in providing award-winning smart mobility IoT solutions for the corporate sectors, with the aim to redefine transit experience for cities and communities. Our primary market lies in the fields of logistics and transportation in Hong Kong and Asia Pacific regions. Clients include property developers, global fashion brands, universities and fleet operators. To quote some business cases, SOCIF provided solutions such as Estimated Time of Arrival (ETA) system to property management and green minibus service providers. SOCIF also provides tracking solutions of CO2 emission to delivery trucks for the global fashion brands.

Product/Service:

ESTIMATED TIME OF ARRIVAL (ETA) SYSTEM FOR VEHICLES

ETA system for vehicles is a Passenger Information System (PIS) that leverages on both the installed hardware and software to enhance daily transit experience for fleet operators, service providers and passengers to make transit decision timely, efficiently and comprehensively. By installing hardware such as android tablet, gps modules or OBD devices on the vehicles, we will leverage on the retrieved transport data (e.g. location, speed and acceleration) to develop a customized ETA algorithm for our clients. Our award-winning solutions have been adopted by large property developers, global fashion brands, universities and fleet operators in Hong Kong. We can provide customized mobile application and api (system integration) for your users. We also provide web-based management dashboard for fleet management with customized features for different industry sectors. The solution aims to enhance the transit experience for cities and communities.

SEAT VACANCY DETECTION (SVD) SYSTEM FOR VEHICLES

SVD system for vehicles is a Passenger Information System (PIS) that leverages on both the installed hardware and software to enhance daily transit experience for fleet operators, service providers and passengers to make transit decision timely, efficiently and comprehensively. By installing camera devices at the door of the vehicles, we will leverage on the captured photos in real time to develop a tailor-made computer vision model and identify the inflow and outflow of passengers, and thus compute the live number of passengers within the vehicles. We can provide customized mobile application and api (system integration) for your users. We also provide web-based management dashboard for fleet management with customized features for different industry sectors. The solution aims to enhance the transit experience for cities and communities.

Wildfaces Technology Limited

TEL: (852) 3892 7631
Email: iona.tong@wildfaces.ai
Website: <http://wildfaces.ai/>
Address: Flat M33, G/F, 18 Lee Chung Street, Chai Wan, Hong Kong

Wildfaces owns On-the-Move Recognition domain specially for complex and congested scenes as its underlying Vision-based AI technology has been patented. Company has achieved many breakthroughs and has overcome the constraints faced by other suppliers that often require high infrastructure costs, massive camera numbers, high network bandwidth and high computation including expensive GPUs. As such, Wildfaces' system is highly cost effective and 20X cheaper being computing-light and requiring only a CPU - no expensive GPUs. In the facial recognition space, Wildfaces requires only ONE low resolution moving camera, replacing 50 high-resolution fixed cameras required for Traditional systems.

Product/Service:

ON-THE-FLY FAST ACCESS CONTROL SYSTEM

WildFaces patented On-the-Move technology works without any FIXED CCTV or turnstile. Using drone based or wearable cameras it can determine if unauthorized people are on site or if they are not wearing safety uniform. The system can cope with the ever-changing construction layout covering vast areas, authenticating 100 workers simultaneously.

AUTONOMOUS OPERATION

WildFaces vision-based AI is designed to automate time-consuming & tedious manual processes . It can regularly monitor work progress & status for each site ensuring the construction is going according to the plan. It can also analyze worker productivity h

BACKGROUND OF HONG KONG'S ICT INDUSTRY

Hong Kong is a leading business centre in the Asia-Pacific region mainly due to her advanced telecommunications infrastructure. In 2020, the industry of information and communications generated HK\$95.6 billion in revenue, contributing to 3.5% of GDP.

In the World Competitiveness Yearbook 2020 by the International Institute for Management Development (IMD), the overall competitiveness of Hong Kong rank fifth among 63 countries, and also for the part of digital ranking.

Hong Kong has a large pool of skilled ICT professionals, providing services for clients spanning a wide range of businesses. According to the Census and Statistics Department of the Hong Kong Government in 2019, there were 11,095 enterprises in ICT industry, with 108,982 persons engaged in the ICT sector, including professional and technical workers (e.g. network engineers, technicians, programmers, web portal designers, information technology professionals, etc.) and workers in non technical fields (e.g. clerical and accounting staff).

To foster the ICT development, Hong Kong Government has put in place various initiatives, such as funding support, provision of infrastructure, international cooperation and manpower development. Also, with rising corporate engagements in incubation and accelerators programmes, new initiatives to help start-ups hatching from universities, particularly the emergence of start-ups with a "unicorn" status, it is anticipated that Hong Kong's technology sector may soon reach a tipping point and will be propelled into much faster growth.

Currently Hong Kong Government has a Talent List which comprises 11 professions. Talents in the List are those Hong Kong needs most in the immediate to medium term for the development of economy. Big data software engineer and cyber security specialist are specifically needed for Hong Kong's ICT industry. We believe the unlimited opportunities in Hong Kong definitely attract targeted ingenious talents from around the world to create cluster effects, stimulate the development of local talents and propel Hong Kong forward.

We also believe with new opportunities from the Guangdong-Hong Kong-Macao Bay Area development, Hong Kong will further capitalize on its advantages in R&D capabilities, technological infrastructure, legal system and intellectual property protection to spearhead the ICT development, and act as a solid business platform for innovative companies to access the Asian market, or mainland China's innovative companies to go international.

ORGANISATION OF HONG KONG PAVILION

INTRODUCTION TO HKSIA

The Hong Kong Software Industry Association Limited (HKSIA) is the organiser of Hong Kong Pavilion. It is a Hong Kong registered non-profit making organisation founded by a group of IT professionals and IT corporations in Hong Kong dedicated to the China market. Its main purpose is to identify and develop business opportunities for Hong Kong software companies through cooperation with the mainland or overseas counterparts. The consensus driving the collaboration of all in forming the association is the conviction that the Hong Kong software industry can better manifest itself and benefit by integrating with the vast market and resources of the mainland.

HENCEFORTH, HKSIA HAS SET ITS

OBJECTIVES ON

1. Promoting software industry development and exploring business opportunities in the mainland and overseas.
2. Coordinating with foreign software industry for better resources allocation, benefits sharing and mutual added value.
3. Strengthening co-operation and enhancing communications between Hong Kong and mainland software industries.
4. Achieving mutual benefits of business growth for Hong Kong and mainland software companies through international exposures, exchange of project management skills and technical talents.
