CONTENT

INTRODUCTION

Event：   Malaysia Technology Expo 2024
Time：   22nd – 24th Febuary 2024
Venue：   F01 to F03, F22 to F24, G01 to G03 and G22 to G24,Hall 3,Level 3,
               World Trade Centre, Kuala Lumpur
Organiser： PROTEMP Exhibitions and Conferences Sdn Bhd (No. 492079-W)

The Malaysia Technology Expo 2024 (MTE 2024) is a leading innovation showcase in Asia with a history spanning over two decades. Recognized for fostering innovation and excellence in research, MTE has gained support from Malaysia's ministries. The upcoming event, taking place from 22-24 February 2024, offers a hybrid experience, combining a vibrant in-person event at the World Trade Centre Kuala Lumpur with a virtual component. This allows participants to interact with inventors, investors, and visionaries both physically and virtually, expanding the reach to an international audience. MTE has evolved from its origins as "Expo S&T" and continues to connect visionaries and groundbreaking technologies, celebrating the limitless potential of human creativity and technological advancement.

MTE 2024 presents a global platform for recognition and advancement through its prestigious awards program. The event, supported by 12 international inventors' associations and research institutions, aims to acknowledge outstanding innovations.

In addition to awards, MTE offers an Innovation Marketplace, connecting exhibitors with high-quality investors to bring innovative solutions to life. With a strong anticipation of local and international participation, MTE provides opportunities for face-to-face engagement among innovators, exhibitors, and award contenders. The event's agenda includes knowledge-sharing sessions, technical presentations, and various activities for a fulfilling experience in Kuala Lumpur.

INTRODUCTION

Hong Kong Pavilion

"The promotion of Hong Kong outstanding information and communication technology (ICT) industries in the ASEAN markets 'is organised by Hong Kong Software Industry Association (HKSiA) and funded by the Trade and Industrial Organisation Support Fund of the Trade and Industry Department of the Government of the Hong Kong Special Administrative Region.

The Project, running from 2023 to 2024, sets up 4 Hong Kong Pavilions in different high tech expo of four Asean countries, including Singapore, Thailand (Bangkok), Malaysia (Kuala Lumpur) and Indonesia (Jakarta) and organizes 4 workshops to promote the latest technologies and practical tools available to the industry in Hong Kong. It provides a valuable opportunity for Hong Kong companies to upgrade and showcase their excellent products and services.

HKSiA sports a pavilion of 120sqm in DigiTech ASEAN Thailand for 20 Hong Kong companies to co-exhibit and promote their businesses in Thailand. The exhibitors are focusing on three key areas: BigData, AI, and SaaS.

WEBSITE   www.citictel-cpc.com
ADDRESS   20/F, Lincoln House, Taikoo Place,
               979 King's Road, Quarry Bay, Hong Kong

We are CITIC Telecom International CPC Limited (CITIC Telecom CPC), a wholly-owned subsidiary of CITIC Telecom International Holdings Limited (SEHK: 1883), serving multinational enterprises the world over by addressing their specific ICT requirements with highly scalable tailored solutions built upon our flagship technology suites, comprising TrueCONNECT private network solutions, TrustCSI information security solutions, DataHOUSE cloud data center solutions, and SmartCLOUD cloud computing solutions.

With the motto Innovation Never Stops, we leverage innovative technologies, embracing AI, AR, Big Data, IoT, and other cutting-edge emerging technologies to transform technical potential into business value for our customers.

For more information, please visit www.citictel-cpc.com.

PRODUCT/SERVICE :

AI-AR Remote Hand/ AR Remote Hand

Intelligent operations are the future for all industries to reinvent a range of new business models. To reimagine digital business potentials, CITIC Telecom CPC partnered with ASTRI in 2019 to launch AR Remote Hand in 2020, and AI-AR Remote Hand Service in 2021.

This revolutionary solution utilizes CITIC Telecom CPC's self-developed "patent pending" and award-winning AI algorithms, integrates AI-enabled cognitive object recognition solutions (CORs), AR, big data, and IoT techniques to achieve remarkable breakthroughs, projecting holograms of technical manuals, analytical figures, complex instructions, and much more, onto a heads-up display to stream real-time intelligent solutions. It enhances data integration through computer vision technology and machine learning algorithms, providing remote workers with 2D and 3D diagrams for better data visualization. As a result, the AI-AR Remote Hand can identify, locate and count objects within 95 milliseconds with 99% accuracy and increases the service productivity of field workers by up to 50%.

AI Visual Security

CITIC Telecom CPC's AI Visual Security is a game changer reinventing the "Seeing is Believing" security model, protecting enterprises from sophisticated malware with "Quick and Fast" trace. The out-of-box security solution is using AI-powered algorithm integrates weakly supervised regularization algorithm, visual computing, and neural network for transforming datasets into graphic images and mapping potential malware.

This unique and creative AI algorithm source code named "SYSTEM AND METHOD FOR DETECTING MALWARE" is patent pending. It enables the identification and classification of malware threats at a significantly faster pace compared to traditional solutions. With breakthroughs in AI technology, the processing time is reduced to a sub-second level, estimated to be 10x to 100x faster.

CPC formulated its comprehensive ICT-MiiND strategy to combine the latest innovations with the capability to leverage powerful Cognitive Object Recognition and intelligent algorithms, to build a reliable ICT ecosystem that elevates enterprises' digital transformation business intelligence initiatives.

Founded in 2005 headquartered in Hong Kong, OceanX Technology has been developing innovative products including OceanFax - the Asias No.1 award-winning & best-selling fax server, as well as OceanX ECM - the first cloud based ECM System in Asia. OceanX ECM won the Hong Kong ICT Awards 2019: Smart Business (Solution for Business and Public Sector Enterprise) Certificate of Merit and acquires APAC CIO Outlook Top 25 DMS award, among 400 DMS candidates.

As a partner of global technology giants - SAP, Cisco, Avaya, HP, Ricoh, Microsoft & Huawei, the company's mission is to develop world-class solutions for local markets.

PRODUCT/SERVICE :

OceanX ECM

OceanX ECM is the first cloud-based Enterprise Content Management System in Asia. It won the Hong Kong ICT Awards 2019: Smart Business (Solution for Business and Public Sector Enterprise) Certificate of Merit and acquires APAC CIO Outlook Top 25 Document Management System award, among 400 DMS candidates.

OceanX ECM is a comprehensive Enterprise Content Management system which includes Document Management System, Document Capture, Document Processing Center, Share and many powerful features. It supports cloud-based and on-premise. Powerful features like E-mail Management enable users to easily file and search all incoming and outgoing e-mails with attachments; one interface for managing e-mails and ECM. Office Add-in tightly integrates with Microsoft Office, users can directly save documents into OceanX ECM. Its patented technologies like Bulidingblocks, CapturePlus and ImagePlus increase user adoption rate.

OceanFax Fax Server

The OceanFax Fax Server is Asia's NO.1 best-selling and award-winning fax server. It is the most innovative world-class fax server which delivers documents efficiently and reliably, seamlessly integrates with email, ERP and MFP, supports IP faxing, streamlining business processes, automating faxes and increasing productivity.

OceanFax Fax Server is designed to support high-volume document delivery in an efficient and reliable way. Built on .NET technology, OceanFax is the first fax server brand in the field to support Unicode, Multi-language, Fax Data Mining, Super User, Black & White List, Windows on the Web, Fax Report Generator and Approval & Stamp. Besides, OceanFax achieves the highest quality of fax conversion with its original ImagePlus Patent Technology, supports Least Cost Routing, Self-defined Chinese & Image Header & Footer and Quick Search.

PRODUCT/SERVICE :

EDNS Domains

EDNS Domains is a decentralized name service that supports most established blockchain networks, offering multichain and crosschain functionalities. It enables users to translate machine byte-code into human-readable names that can seamlessly move across multiple blockchains.

PharmCare Technology Limited

TEL (852) 5336 0883
EMAIL aau@pharmcare.app
WEBSITE www.pharmcare.app
ADDRESS Room 3, Cyberport Smart Space 8, 25/F, CDW Building, 388 Castle Peak Road, Tsuen Wan, NT, Hong Kong

PharmCare was founded in 2019 as a system to simplify the prescription process and digitise medication management data for community pharmacies. The PharmCare Community Pharmacy System enables pharmacists to easily deploy patient-friendly drug labels and manage medical records electronically with ease.

In early 2023, PharmCare launched a free mobile app with medication label recognition, medication records, and reminder functions. Patients and caregivers can easily identify different medications and generate drug icon labels by taking a photo of their medication label or package. The app can help alleviate the stress caused by lack of drug knowledge of caregivers.

PRODUCT/SERVICE :

PharmCare

PharmCare is a medication management app that focuses on improving the accessibility of drug label instruction for elderly and migrant workers. Due to the language barrier and physical condition, they have low medication adherence and suffer from the adverse effect. To solve the difficulty, PharmCare provides AI recognition, drug icon labels and language conversion. Patients or caregivers just need to take a photo of the drug label, Ai will recognise the words and provide them a translated medication reminder with easy-to-read drug icons. Users can also note any side effects or issues they encounter while taking the medicine. They can display a complete medication list to assist with inquiries when consulting with the pharmacist.

The comprehensive function improves label understanding, enhances medication accuracy, reduces caregiver stress and family conflicts. Empowering the vulnerable groups to achieve health equity.

ADDRESS Unit 1017, 10.F, Building 19W, No. 19 Science Park West Avenue, Hong Kong Science Park, Pak Shek Kok, Hong Kong

Real Matter Technology Limited is a Fintech company that envisions implementing chip-level blockchain identity technology and smart contract-on-chip credentials to facilitate real-world asset tokenization and provide verifiable solutions for Web3 crypto-asset SAAS platform :

* Chip-level Blockchain Identity Platform * - unlocks the crypto-asset market for the general ID chip card users.
* Smart Contract-on-Chip Credential Platform * - unlocks the web3.0 asset liquidity market for the crypto-assset service users
* Real World Asset Tokenization platform * - unlocks the whole asset management market to the virtual world with crypto-asset

PRODUCT/SERVICE :

Chip-level Blockchain Identity

Assets on the blockchain are encrypted by public-private key pairs. Chip-level blockchain uses IC chips to store private keys and to process signatures, raising blockchain security and asset protection to the highest level. Our chip technology provides the unhackable private key management for crypto wallets.

Real World Asset Tokenization

Tokenization is not limited to NFT sales, but real-world asset investors can withdraw investment returns early through tokenization, and share any future benefits with token investors. Our tokenization technology, including investor exit plan, protects the interests of both real-world asset investors & token investors.

ADDRESS   16/F Unit C, Man On Commercial Building,12 Jubilee Street, Central, Hong Kong

GENU.N is a platform that provides a seamless solution integrating NFCs or QR codes with blockchain technology to create a digital twin for physical products. The digital twin can be utilized to help companies create unique digital experiences, authenticate products, targeted marketing and more.

PRODUCT/SERVICE :

GENU.N

GENU.N utilizes blockchain technology to create a digital collectible (twin) for physical products to help companies with:
1. Targeted Marketing: When a brands customer claims the twin for their product, GENU.N has specific metadata written into the twin about the product. The twin can then be used by brands to push out targeted marketing campaigns based on each user's purchasing history.
2. Authentication: When clients scan or tap a product, they're brought to our platform and can claim a digital collectible to easily verify a products authenticity.
3. Customer Loyalty: GENU.N seamlessly integrates Web 2 e-commerce services with Web 3 components. Every physical item is paired with a corresponding twin that customers can use to unlock special discounts or accumulated points based on the items they purchase
4. Digital Experiences: The digital twin can unlock unique content and experiences accessible only by those holding the twin.

WildFaces Technology Limited

TEL   (852) 8216 2219
EMAIL   adm@wildfaces.ai
WEBSITE   www.wildfaces.ai
ADDRESS   Unit 22, Level 6, Core C, Cyberport 3, 100 Cyberport Road, Pokfulam, Hong Kong

WildFaces' patented "On-The-Move" Artificial Intelligence (AI) based analytics system, WildAI, provides video, sound and smell analytics from moving sensors/ cameras on drones, moving robots and body-worn cameras. Such systems have been implemented on numerous government and commercial sites worldwide.

Applications range from anonymized tracking (with privacy protection) and traffic congestion management to sound and smell analytics.
WildAI requires minimal training, is computing light (does not require GPUs) and can be deployed very quickly. It:
• Operates in real-time even when the sensor is "On-the-move".
• Requires little data training – no labelling
• Is infrastructure light – fewer cameras required
• Is computation light

PRODUCT/SERVICE :

No Deep Learning No Coding Predictive Maintenance

The current focus is on Predictive Maintenance to minimize manual involvement in inspections which can be very expensive. Maintenance of equipment is not amenable to commonly used deep learning based AI as equipment failures happen at rare instances and a sufficient dataset is never available.

To achieve this WildFaces has evolved a very new type of Artificial Intelligence (AI) technology.

AI essentially emulates human thinking. This new AI Approach (namely WildAI) combines complex rule based logic (heuristics) with machine learning and deep learning (Advanced Neural Network) to better emulate complex human intelligence in solving real-life problems. This approach will require NO or minimal deep learning exercise. This significantly reduces the amount of data annotation required and eliminates the use of GPUs.

BACKGROUND OF HONG KONG'S ICT INDUSTRY

The ICT industry in Hong Kong has undergone rapid development over the past few decades, and has emerged as one of the leading business and financial centers in Asia and globally. Hong Kong's ICT industry is highly diversified, covering a wide range of sub-sectors such as telecommunications, e-commerce, data center, software development, and information security among others.

The ICT industry in Hong Kong is expected to continue its strong growth in the years to come and make significant contributions to its economy. According to the latest forecasts, the total output of Hong Kong's ICT industry is expected to reach US$31.2 billion by 2023, which is equivalent to 8.5% of Hong Kong's GDP. Meanwhile, the Hong Kong government is actively promoting the development of the ICT industry, including through investment in upgrading digital infrastructure and enhancing technical training to boost industry competitiveness.

Hong Kong's ICT industry is attracting more and more talented people. By 2023, the size of Hong Kong's ICT workforce is expected to exceed 100,000, including both technical and non-technical personnel, providing Hong Kong with a continuous pool of human capital for sustainable development.

In the years to come, Hong Kong's ICT industry will continue to be driven by the global economic digital transformation and the Asian technology boom. As the Hong Kong government and enterprises continue to push forward various innovative projects and digital transformation plans, Hong Kong is poised to maintain its leading position in the ICT industry and inject new impetus into the economic development of Asia and the world.

ORGANISATION OF HONG KONG PAVILION

INTRODUCTION OF HKSIA

The Hong Kong Software Industry Association Limited (HKSIA) is the organiser of Hong Kong Pavilion. It is a Hong Kong registered non-profit making organisation founded by a group of IT professionals and IT corporations in Hong Kong dedicated to the China market. Its main purpose is to identify and develop business opportunities for Hong Kong software companies through cooperation with the mainland or overseas counterparts. The consensus driving the collaboration of all in forming the association is the conviction that the Hong Kong software industry can better manifest itself and benefit by integrating with the vast market and resources of the mainland.

Henceforth, HKSIA has set its

Objectives on
1. Promoting software industry development and exploring business opportunities in the mainland and overseas.
2. Coordinating with foreign software industry for better resources allocation, benefits sharing and mutual added value.
3. Strengthening co-operation and enhancing communications between Hong Kong and mainland software industries.
4. Achieving mutual benefits of business growth for Hong Kong and mainland software companies through international exposures, exchange of project management skills and technical talents.
