EXHIBITION

Hong Kong Pavilion

"The promotion of Hong Kong outstanding information and communication technology (ICT) industries in the ASEAN markets 'is organised by Hong Kong Software Industry Association (HKSiA) and funded by the Trade and Industrial Organisation Support Fund of the Trade and Industry Department of the Government of the Hong Kong Special Administrative Region.

The Project, running from 2023 to 2024, sets up 4 Hong Kong Pavilions in different high tech expo of four Asean countries, including Singapore, Thailand (Bangkok), Malaysia (Kuala Lumpur) and Indonesia (Jakarta) and organizes 4 workshops to promote the latest technologies and practical tools available to the industry in Hong Kong. It provides a valuable opportunity for Hong Kong companies to upgrade and showcase their excellent products and services.

HKSiA sports a pavilion of 120sqm in DigiTech ASEAN Thailand for 20 Hong Kong companies to co-exhibit and promote their businesses in Thailand. The exhibitors are focusing on three key areas: BigData, AI, and SaaS.

ADDRESS   F06, Entrepreneurship Centre, 5/F, Core F, Cyberport 3, 100 Cyberport Road,
                 Hong Kong

AnlyVis is an Edge AIoT (Computer Vision) PaaS that provides a no-code, scalable, customizable and affordable AI solution for enterprises. Our solution empowers businesses with Edge AI technologies, making it possible to capture visual information from the surrounding environment and gather valuable image data for cutting-edge deep learning models. AnlyVis offers a range of solutions including object detection, car recognition, paperless workflow, crowd management, and ESG goal achievement. With flexible pricing for teams of all sizes, AnlyVis is a cost-effective solution for businesses looking to incorporate AI into their operations.

PRODUCT/SERVICE

Anlyvis Edge AIoT Management Platform
AnlyVis's Edge AI is a AIoT (Computer Vision) PaaS (Platform-as-a-Service) that combines hardware, software, data analytics, and platform, providing a highly scalable, expandable, and customizable solution. Unlike hardware-dependent services, our solution is hardware-agnostic and performs all analysis tasks at the edge. It allows businesses to analyze data without the need for large data-set of images, capture live streams from cameras or sensors, and infer valuable information from the edge in real-time. AnlyVis's Edge AI offers the freedom to adjust desired settings and integrate new analysis features for both new and old data applications.

WEBSITE   https:/www.comedi.com.hk/
ADDRESS   Flat/RM C6, 29/F, TML Tower, 3 Hoi Shing Rd, Tsuen Wan, NT

COMEDI Health was established in Hong Kong in 2021, at a time when the global COVID-19 pandemic was raging. Our team recognized the urgent need for remote medical services. Faced with the gap between remote medical development at home and abroad, we are determined to use advanced technologies such as artificial intelligence, big data, cloud computing, blockchain, and the Internet of Things to provide high-quality remote medical services to more people.

PRODUCT/SERVICE

Comedi Health
COMEDI Health is a comprehensive technology platform that provides remote medical, wellness, personal health monitoring, and lifestyle information. Utilizing AI analytics and triage, customers can directly consult with a doctor or medical professional via video for prescription drugs, doctor\'s notes, and references.

Through an artificial intelligence program, the system can monitor an individual's daily physical activity levels, provide necessary life information and medical guidance, and prevent diseases and treat them in a timely manner. Furthermore, doctors or medical professionals can utilize AI for remote patient assessment, diagnosis, treatment as well as more effective analysis of test results, lab reports and imaging.

               Des Voeux Road Central, Central, Hong Kong

Established in Hong Kong, our company provides cutting-edge IT solutions and professional consultation to address the unmet needs of the medical service industry. With a focus on empowering research institutions, hospitals, and private laboratories, we offer tailored solutions that drive efficiency, enhance data management, and improve patient outcomes.

Our team of experienced professionals leverages the latest AI technologies to develop innovative systems that streamline workflows, optimize resource allocation, and ensure data security. By collaborating closely with our clients, we develop customized strategies that unlock new opportunities and elevate the standard of care within the healthcare ecosystem.

PRODUCT/SERVICE

Smart AI Solutions for Healthcare
Embracing the transformative power of automation, healthcare providers are turning to innovative AI-powered solutions that are revolutionizing diagnostic workflows and enhancing clinicians\' experiences. Among these is DR Sight, an intelligent software system that can analyze chest X-ray images in under a second, identifying up to 18 common radiographic findings and alerting clinicians to suspected lesions with prioritized urgency levels.By automating this critical diagnostic step, DR Sight empowers healthcare teams to triage cases efficiently and implement timely follow-up, delivering more effective care. Complementing this is Lung-Sight, an equally groundbreaking AI-driven software for comprehensive lung cancer screening. Analyzing CT scans in under 10 seconds, Lung-Sight automatically outlines each lung nodule with precision, providing accurate size measurements and detailed growth trend comparisons.

The intelligent system streamlines the workflow, transform their diagnostic processes, optimizing efficiency, reducing costs, and improving patient outcomes.

ISL is an enterprise software application developer with over 39 years of experience in information management and digital transformation.

Our company is headquartered in Hong Kong SAR and has three offices in the Greater Bay Area, as well as a fully functional branch in Singapore. ISL has received multiple awards and recognition from well-known organizations such as Microsoft, HKMA, and Q-Mark. Furthermore, we are a company with patented technologies, including our digital transformation application platform and IoT solution.

PRODUCT/SERVICE
ReportNOW
ReportNOW is a Digital Transformation Platform that helps any organisation to rapidly and accurately transform its business process digitally. With ReportNOWs state-of-the-art technology and tons of practical functionalities, users can quickly digitalize the current processes with our simple and user-friendly No-Code platform and quickly improve the mobility of their task force. Hundreds of enterprises have already adopted ReportNOW in their operations and have successfully transcended thousands of existing processes through digital transformation.

Once ReportNOW is up and running, everyone in the organization is able to append new features in order to further refine the business processes as your company grows.

You are given all the components you need to build your forms and reports with simple drag-and-drop. Our platform supports you with the latest technology, including the use of AI, Augmented Reality (AR) and IoT, etc., to help you keep pace with your business needs and the market trend.

rTag
rTag is a built-in sensor expansion interface which integrates with ReportNOW server to provide related information on the monitor. With the use of rTag, many manual procedures are saved making everyday office operations smooth and efficient. First, it eliminates the need for manual clock-in procedures, ensuring accurate and timely record-keeping in terms of attendance. Whether employees have flexible working hours or fixed schedules, rTag enables them to clock in seamlessly, minimizing the chances of late or inaccurate attendance records.

Additionally, rTag provides smart access control to eliminate the hassle of clock-in jams that often occur during peak hours. rTag offers a secure and convenient alternative to avoid privacy concerns by using sensitive characteristics. Employees can access their workplace easily, enhancing both security and privacy in the workplace.

Moreover, rTag offers a self-owned solution for workplace which greatly reduces chaos in scheduling and using conference room. With just a few taps on their smartphones, employees can reserve conference rooms effortlessly. The integration of rTag also allows the control of conference room equipment through smart devices, streamlining the setup process and enhancing the overall conference experience.

WealthRyse

TEL   (852) 5180 6000
EMAIL   david.lee@wealthryse.ai
WEBSITE   https://www.wealthryse.ai/
ADDRESS   Level 44, Champion Tower, 3 Garden Road, Central, Hong Kong

We are a B2B SaaS business (multi-cloud deployment--currently using primarily AWS). Monthly Revenue comes on product/solution from usage of our plug-and-play virtual terminal, which displays multiple asset classes (equities, fixed income, funds, etc.) in multiple currencies and languages and assembles portfolios on the fly for wealth advisors, CIOs, investment counselors and relationship managers in minutes--and provides rebalancing reports via Genisys AI on a pdf file and report in seconds. Our technical team has over 20 years of collective fintech and portfolio management experience (previously from BlackRock and Credit Suisse), now expanding its solution globally after successful implementation in Asia.

PRODUCT/SERVICE

Genisys AI
At WealthRyse, we believe that wealth is personal, yet it needs to be democratized for the masses. The widening wealth gap, rising retirement costs, and increasing lifespans pose critical challenges to the sustainability of personal wealth of the masses. We advocate a collaborative approach that blends human expertise with advanced artificial Intelligence - our "bionic advisory" models supercharge asset managers and wealth advisors with cost-effective and professional portfolio management done at scale.

WealthRyse help wealth advisors and asset managers to digitally scale their portfolio rebalancing services using our AI-optimized plug-and-play terminal, Genisys (i.e., we are like the "Bloomberg" for advisors and managers) and grow revenue. This is the key pain point for all advisors and managers in terms of being able to provide portfolio reblancings to tens, if not hundreds of clients, on a scalable and regular basis in order to build client relationships and increase revenues.

BACKGROUND OF
HONG KONG'S ICT INDUSTRY

The ICT industry in Hong Kong has undergone rapid development over the past few decades, and has emerged as one of the leading business and financial centers in Asia and globally. Hong Kong's ICT industry is highly diversified, covering a wide range of sub-sectors such as telecommunications, e-commerce, data center, software development, and information security among others.

The ICT industry in Hong Kong is expected to continue its strong growth in the years to come and make significant contributions to its economy. According to the latest forecasts, the total output of Hong Kong's ICT industry is expected to reach US$31.2 billion by 2023, which is equivalent to 8.5% of Hong Kong's GDP. Meanwhile, the Hong Kong government is actively promoting the development of the ICT industry, including through investment in upgrading digital infrastructure and enhancing technical training to boost industry competitiveness.

Hong Kong's ICT industry is attracting more and more talented people. By 2023, the size of Hong Kong's ICT workforce is expected to exceed 100,000, including both technical and non-technical personnel, providing Hong Kong with a continuous pool of human capital for sustainable development.

In the years to come, Hong Kong's ICT industry will continue to be driven by the global economic digital transformation and the Asian technology boom. As the Hong Kong government and enterprises continue to push forward various innovative projects and digital transformation plans, Hong Kong is poised to maintain its leading position in the ICT industry and inject new impetus into the economic development of Asia and the world.

ORGANISATION OF HONG KONG PAVILION

Hong Kong Software Industry Association
香 港 軟 件 行 業 協 會

INTRODUCTION OF HKSIA

The Hong Kong Software Industry Association Limited (HKSIA) is the organiser of Hong Kong Pavilion. It is a Hong Kong registered non-profit making organisation founded by a group of IT professionals and IT corporations in Hong Kong dedicated to the China market. Its main purpose is to identify and develop business opportunities for Hong Kong software companies through cooperation with the mainland or overseas counterparts. The consensus driving the collaboration of all in forming the association is the conviction that the Hong Kong software industry can better manifest itself and benefit by integrating with the vast market and resources of the mainland.

Henceforth, HKSIA has set its

Objectives on

1. Promoting software industry development and exploring business opportunities in the mainland and overseas.
2. Coordinating with foreign software industry for better resources allocation, benefits sharing and mutual added value.
3. Strengthening co-operation and enhancing communications between Hong Kong and mainland software industries.
4. Achieving mutual benefits of business growth for Hong Kong and mainland software companies through international exposures, exchange of project management skills and technical talents.
